

## **New Flag Pole Area for the Whitman Baseball & Softball Association**

Zach Samya, of BSA Troop 22 in Whitman, will be building a new brick flag pole area and installing a flag pole at the fields used by the WBSA, at the Whitman Middle School, as his Eagle Scout Project. This project idea was brought to Zach by a representative of the WBSA, to not only improve the look of already beautiful ball fields, but to show support and pride in our nation by having a place to fly a traditional American Flag during games.

The area will be made up of approximately 300, 4" x 8", bricks; and the goal is to have every one of them engraved with family names, ball player names, names of local business that support WBSA and the names of anyone who supports youth sports and scouting in Whitman

To fund this project, custom engraved bricks will be sold at \$35 each. These bricks will be placed around the base of the flag pole.

Thank you for your support of WBSA and Scouting in Whitman. An announcement will be going out after the final bricks are sold, with a date for the unveiling.

On behalf of Zach Samya, Eagle Scout Candidate, the WBSA and Troop 22, we hope you can support the project by buying a brick and join us on the day the first flag is raised.
